If thou lend money to any of my people that is poor by thee, thou shalt not be to him as an Usurer, neither shalt thou lay upon him Usury, *Exod. 22. 25.*  
 Take thou no Usury of him, or encrease; but fear thy God, that thy brother may live with thee, *Lev. 25. 36.*

## A Prognostication.

### *An Explanation of the Tables of Interest.*

**I**N the first Table you have the Interest due upon any sum of money, from 1 shilling to 40, for a year or any time under : over the head of the Table is the Denomination of time ; under that , over the head of the Common Angles, are these letters, *S. P. F.* *S* signifying shillings, *P.* pence, and *F.* farthings.

In the second Table is the Interest due upon any sum o money , from one pound to ten pounds , &c. and over the head of the Table, the Denomination of time, &c. as before.

In the third Table is the Interest due upon any sum from ten pounds to an hundred pounds, &c. over the head of the Table is the Denomination of time : over the head of the Angles are these letters , *L. S. P.* *L* signifying pounds , *S.* shillings, and *P.* pence.

Now for example : If you would know the Interest of ten pounds for any time, look in the beginning of the third Table, and in the second column on the left hand find the sum. Then in the common Angle to the right hand, you shall find that ten pounds for one month, gives Interest one shilling ; for three months, three shillings ; for six months, six shillings, &c. but if you desire to know the Interest due upon an odde sum containing pounds and shillings, you must work thus :

As for Example : If your sum be fifteen pounds five shillings , and you desire to know the Interest thereof for a month, seek in the third Table, and you shall finde the Interest of ten pound for one month , is one shilling : in the second Table you shall finde the Interest of five pounds for one month , is six pence : and in the first Table you shall find the Interest of five shillings for one month , is one farthing : which three sums put together, shew the interest of fifteen pounds five shillings for one month , to be one shilling six pence farthing ; which is as exact as can be , where the peny is divided into no smaller parts then farthings. If you would know what Interest fifteen pound five shillings gives for two months , double the Interest thereof for one moneth, and you have your desire.

The Use and Explanation of the Table.

**T**He first Column towards the left hand, sheweth the Years of a Lease or Annuity; and right against each Year, is the Years, Months, and Parts of a Months Purchase that such a Lease or Annuity is worth.

Example:

Suppose there be a Lease or Annuity to continue 8 Years, and you would know how many Years Purchase it is worth, look in the Table for Eight Years of a Lease, and against the same you will finde 6 2 5, which sheweth such a Lease to be worth 6 Years, 2 Months, and half a Months Purchase.
